Architect Corporation AA 26002404

AKEA Design, Inc. offers a full complement of Revit and AutoCAD design services. We can provide 2D and 3D models of facilities, as well as ALTA surveys, LIDAR point cloud scanning, photography, and field measurements. We also have the capability to print a full 3D model from the Revit file.

We provided all of these services for the Gainesville VAMC at their Malcolm Randall VA Medical Center facility. Due to the retirement of personnel, plans, drawings, and specs were not archived in a user-friendly manner, and it was difficult to determine which were the most recent.

AKEA provided all necessary labor, materials, and essential technology necessary to complete an existing facility survey and converted the existing facility record drawings into a Revit 3D model and databases.

AKEA would be honored to discuss how we can offer these solutions to your organization and assist you in not only organizing your existing facility information, but in using the latest technology to fully utilize the capabilities of these records.

**“The ALTA survey and REVIT model provided will greatly improve the ability to design and construct future projects minimizing conflicts between engineering disciplines and maintaining established schedules and milestones. AKEA efficiently and successfully took as-built drawings created as late as 1967, along with existing facility conditions, to create a masterpiece.”**

**-David W. Marquis, Gainesville VAMC Project COR**
